

COST OF TRAINING 2007

The following is an approximation of the costs that students are likely to incur during the training. Any calculation would need to include, over and above the following, an individual's travel and accommodation costs, telephone bills, etc. A lot of communication during the training occurs on email strings, so a student needs to have regular access to a computer. Please note that each therapist sets their own fee level and fees currently range between £75 – 45. All costs will increase with inflation during the period of training.

FOUNDATION YEAR

Single payments
